

Meet us at Intersec 2012 in Dubai

January 15 - 17, 2012
Booth No. 5-319C

Integrated Security

The integration of different security technologies is the core challenge of a successful security concept. We will show You the perfect combination of high end technologies for Your central monitoring station!

Visual Display Solutions for Command & Control.

eyevis is a leading manufacturer of large screen display systems for control rooms. Thanks to our technological advantages, eyevis is the ideal partner for the realisation of complete and customised solutions. We create every component necessary for the overall system. In addition to rear-projection cubes and LCDs, we also develop the graphics controllers and wall management software that allows you to control your display.

Video Analytics

ACIC develops high performance, field-proven, video analytic systems. ACIC's solutions are designed and packaged for simplicity in a cost effective way. ACIC transforms video surveillance into a proactive, event-driven process, using PC-based devices for real-time detection, alert and tracking of intruders, vehicles and threats.

WinGuard – The open platform for building and security management

WinGuard, the integrated security and building management system, is the platform for the efficient organisation of the entire corporate security. WinGuard concentrates the experience of more than 500 installations in various sectors and applications, integrating more than 300 interfaces to security-, communication- and building automation systems on a uniform, easy to handle user interface for central monitoring stations.

RECARO Guard Healthier and happier at work.

RECARO Guard – the chair that's been tested by German LGA, with a base approved to British Standard for 24-hour use, making it ideal for control and monitoring rooms. As people who have to spend hours on end in a sedentary position and still need to be physically and psychologically fit require the best from their chairs.

High Definition Surveillance Systems.

Avigilon designs, manufactures, and markets award-winning HD surveillance systems. The performance and value leader, Avigilon's solutions protect and monitor thousands of customer sites in more than 65 countries around the world. Avigilon Control Center, the world's first open HD Network Video Management Software platform, and megapixel cameras deliver full situational awareness and actionable image detail.

Know-How and Creativity.

GRUPO FLORIA is a Spanish company with over 35 years' experience in design, manufacture and integration of equipments for the most demanding control centers. High-tech design, innovative layout solutions, ergonomics, engineering coupled with a broad product line of consoles and technical furniture have enabled us to become one of the leading control centers companies worldwide.
